Skills

*An understanding of garment and pattern construction

*An understanding of manufacturing control procedures

*Familiarity with fabric and sewing techniques, as well as the safety and quality of products.

*The capacity to prioritise

Establish safety and quality standards within the company to guarantee the highest caliber of product output at all times. In accordance with the company's strategy and international standards for product performance, safety, quality, and conformance, lead the development and manufacturing of superior products. Put in place a "Right First Time" strategy for technical design and fit, manufacturing control, and manufacturing that will satisfy the demands of "speed to market."

Work History

2025-01 -

2025-06

PRODUCTION QUALITY TECHNICIAN

C&A SOURCING, Tirupur

- Evaluate as the eyes and ears in the Supplier PUs and deliver cross-functional communication that raises awareness of potential issues 'before the event' that may compromise product safety, quality, and/or delivery.
- Actively monitor Supplier performance indicators and take action to escalate new and recurring issues that affect quality and competence KPIs.
- Ensure that product and performance deliverables are met by keeping an eye on market trends and best practices.
- Lead, own, and take responsibility for all quality-related inquiries and problems in a proactive manner. Provide solutions to all relevant internal and external business units.
- To provide root cause analysis and solutions for major quality issues such as Final and Shadow Inspection FAILS, customer returns, central store returns, and so on, as well as to record lessons learned for best practice sharing, the Quality IT tools must be reported, maintained, and monitored on a regular basis.
- Deliver Supplier development of QMS Corrective Action Plan Commitments, Shadow Inspection performance reports and NCR Corrective Actions to validate continuous improvements and capability development of PU's.
- Develop a preventative mindset to avoid sewing issues, inspection, and product failure and rejection.

tasks, enforce execution, and manage time effectively while maintaining attention to detail.

*Effective written and verbal communication

*Problem solving and analytical skills as well as critical thinking and solution driven focus including encouraging the same in others with a forward looking mindset

*Flexible, capable of handling and responding to changes

*The capacity to work independently in a fast-paced setting while exhibiting strong teamwork abilities

*Able to accept accountability and recognize when escalation is necessary.

*Proven capacity to act and make decisions with the needs of the client in mind

*Proficiency in Microsoft Office Suite and PDM/PLM (Product Data Management/Product Lifecycle Management) and Pivott88.

* Proficient in English, both written and spoken, particularly in manufacturing and engineering.

* Knowledge of manufacturing, quality management systems, and 8D methodology.

- Oversee Pre-Production Meetings (PPM) and provide solutions for problems pertaining to Manufacturing Control Processes, Pre-Production Planning, Adequacy of Cutting and Sewing Lines (including Inventory of Machinery, Attachments, and Techniques) and Possible Quality Risk.
- Train and certify Self Inspection Supplier (SIS) / the respective Supplier Trainer / Inspectors and ensure continuous adherence to C&A quality standards and requirements.
- Perform Inspections and quality checks, tests, and sampling procedures of finished product at PU and Conduct In-line, Final and Shadow Inspections when required.
- Provide Quality Assurance reports, such as Supplier Performance and NCR's nonconformity reports, and ensure that the supply base is performing better by closely monitoring its performance.
